# EBONITE

## MAVERICK

The Maverick is the newest addition to Ebonite's high performance line. The brand new core design in the Maverick, based on our Warrior core, produces an enhanced revving action to create hairpin turns that will put your competition in panic mode. Get ready to take flight with this modern day warrior.

## MAVERICK CORE

We started with our successful Warrior core design and made some minor modifications to the base creating a dual band design enlarging the volume of mass away from the pin. This change allows the Maverick Core to store more energy for the back end of the lane.
