

We asked Pro Shops to demo the ball during its development. This is what they said:

“Shots missed wide early still held line and shots played deeper still had enough traction to carry.”
- B. Burns

“Absolutely Incredible.”
-M. Cousins

“Could play many different parts of the lane.”
-R. Gallagher

“Rolls good with a predictable backend.”
-J. Tiptanyartorn

“I enjoyed the continuous ball reaction.”
-S. Endres

VERDICT

**THE VERDICT
IS IN!**

EBONITE

GSV-1

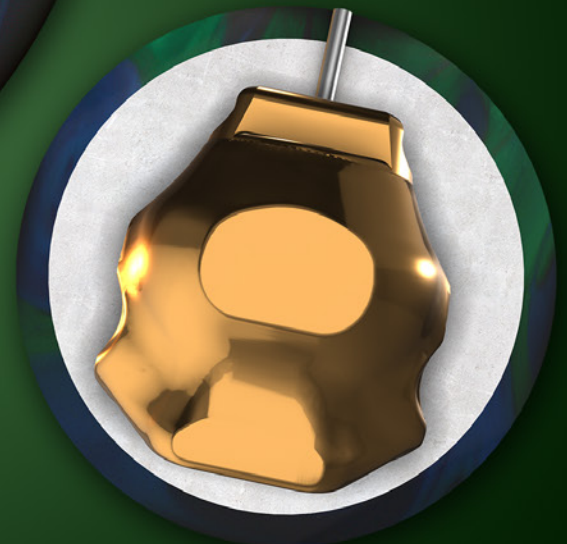

GOOD STUFF VERSION 1, or GSV-1, represents a new generation of coverstock for Ebonite. Developed after intensive study of our proven GB series of coverstocks, GSV-1 focuses on bonding at the molecular level.

GSV-1 has a much looser molecular bond compared to the GB series, creating new influences on performance and traction.

JUSTICE CORE

The Justice Core represents the third generation of the proven Warrior Core. This core's numbers fit perfectly between the Warrior and Maverick, offering the best of both worlds.

FINISH: 500/2000 Abralon™
CONDITION: Heavy Oil
REACTION: Aggressive Mid-Lane and Backend
WEIGHTS: 12-16lbs
MASS BIAS: 0.018
